

# LCC Castability Checker version 3.4 (sept. 2020)

*for designers and suppliers of castings*

Lautus Castability Checker (LCC) is a clever tool to calculate the castability of a CAD design. Handling is remarkably easy. Anyone can use it without training. The pre-processor and the postprocessor work fully automatically. The compact hardware makes it *plug-and-play* on each location.

NEW VERSION 2020 with a.o.:

- aluminium cast housing (hardware)
- upgraded algorithms (software)
- new automatically created pdf report <1Mb
- die- / mould-temperatures are included
- riser predictor with min. dimensions.

*new software upgrade,  
well-known interface*

*new hardware*
